

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	01-01-2026
Student ID	BOBBILI REVANTH
Project Name	Employee ID Card Request
Maximum Marks	

Functional Requirements

Requirement ID	Functional Requirement	Description
FR-1	Submit Employee ID Card Request	Employees can submit new, replacement, renewal, or lost ID card requests through the Service Catalog.
FR-2	Employee Information Capture	The system captures employee details such as Employee ID, Name, Department, Designation, Location, Contact Number, and Email.
FR-3	Approval Workflow	Requests are automatically routed to the Reporting Manager and/or HR for approval before processing.
FR-4	Record Management	The system creates, updates, and maintains request records in the Employee ID Card Request table.
FR-5	Request Tracking	Employees can view the real-time status of their submitted requests through the Service Portal.
FR-6	Automated Task Assignment	Approved requests are automatically assigned to the HR or Administration team for ID card generation.
FR-7	Email Notifications	The system sends email notifications for request submission, approval, rejection, assignment, and completion.
FR-8	Attachment Support	Employees can upload supporting documents such as photographs or identity proof when required.
FR-9	Status Management	The system updates request status automatically (Submitted, Pending Approval, Approved, In Progress, Completed, Rejected).
FR-10	Request History	Employees and administrators can view previous ID card requests and their current status.
FR-11	Search and Filter	HR administrators can search and filter requests based on employee name, department, status, or request type.

Requirement ID	Functional Requirement	Description
FR-12	Reporting and Dashboard	HR administrators can generate reports and dashboards to monitor request volumes, approval times, and SLA compliance.
FR-13	Role-Based Access	Different user roles (Employee, Manager, HR Administrator) have access only to authorized functions and records.
FR-14	SLA Management	The system monitors request completion against predefined Service Level Agreements and escalates overdue requests automatically.

Non-Functional Requirements

Requirement ID	Non-Functional Requirement	Description
NFR-1	Performance	The system should process employee ID card requests quickly with minimal response time.
NFR-2	Security	Only authorized employees, managers, and HR administrators can access or manage employee ID card requests.
NFR-3	Reliability	The system should operate without failures while ensuring data integrity and accuracy.
NFR-4	Usability	The application should provide a simple, intuitive, and user-friendly interface through the Service Portal.
NFR-5	Availability	The system should be available 24x7 with minimal downtime.
NFR-6	Scalability	The system should support a growing number of employees and requests without performance degradation.
NFR-7	Maintainability	The application should be easy to maintain, configure, and enhance with new business requirements.
NFR-8	Auditability	All request activities, approvals, and status changes should be logged for auditing and compliance purposes.
NFR-9	Data Integrity	Employee request data should remain consistent, accurate, and protected from unauthorized modifications.

Requirement ID	Non-Functional Requirement	Description
NFR-10	Compatibility	The application should work seamlessly across modern web browsers and mobile devices supported by ServiceNow.
NFR-11	Notification Reliability	Email notifications should be delivered promptly for every important request event.
NFR-12	Compliance	The system should comply with organizational security policies and HR data management standards.
